

## Valuation Attempts

This section of the dashboard displays the total amount of valuation attempts, requests for monthly updates, and inquiries to contact agents that were ran in your brokerage.

1. From your admin dashboard, select the “Valuation Attempts” tab.

2. You will see three different graphs: valuation attempts, requests for monthly updates, and inquiries to contact agent.

Valuation Attempts: This is the number of people who have looked to see “how much their home is worth”, AKA potential seller leads!

Requests for Monthly Updates: This is the number of people who have signed up to receive monthly updates for a property, AKA potential buyers!

Inquiries to Contact Agent: This the number of people who have contacted the listing agent of a property.

3. This data will then be made into pie charts that split up the data by corporate and agent accounts.
