

My Coming Soon Listing will not Add; What do I do?

There could be a few things stopping your Listing from adding:

When attempting to add a Coming Soon Listing or Quiet Listing, but there is no action after clicking "Add Listing," please check the following:

1. Are all Required fields filled out?

The screenshot shows a listing form with three main sections: Listing Location, Features, and Pricing & Timeline. Each section contains several input fields, some of which are highlighted in yellow to indicate they are required. The Listing Location section includes fields for Street Address Visibility (set to 'Viewable by all users'), Address, County, and School District. The Features section includes dropdown menus for Number of Bedrooms, Number of Bathrooms, Property Type, Age of Home, and Approx. Lot Size, along with a text area for Listing Description. The Pricing & Timeline section includes input fields for Asking Price, Selling Broker Commission %, Live in the MLS, Showings will start on, and Offers Reviewed on.

2. Uploaded pictures cannot be more than 5MBs per picture.
3. Do you have a popup blocker on your browser? If so, it can interfere with your listing adding to your account. Please test by checking/disabling your popup blocker temporarily. To do so, here are links for your browser.
